

API 675 PUMP SERIES

● Technical Features

💧 Performances:

Flow rate up to . 3500 l/h with single pump head

Pressure up to 700 bar

Metering accuracy reaches 1%

Full API 675 compliant

💧 Features:

Integrated "Oude" worm gear pair, low noise, high transmission efficiency, large torque

Low maintenance, long service life

Plunger and hydraulic diaphragm design

Built-in relief valve, compensating valve and limit valve

Single and double diaphragm, PTFE or metallic made with rupture indicator

💧 Adjustment:

0-100% stepless adjustment of flow

Frequency conversion option

💧 Materials:

Cast iron or anodized cast iron casing

Various liquid end executions: SS 304L, SS 316L, Hastelloy C, PVC, PVDF, PTFE...

💧 Customized solutions:

Explosion proof motors

Special motors

UNI/ANSI flanges

High viscosity solutions

HYDRAULIC DIAPHRAGM METERING PUM

P OR PLUNGER PUMP — API 675 COMPLIANT
